Junction at R43 and Lynx Avenue

View of the site towards the west. Neighbouring residential development visible in the background

View of the site FROM Lynx towards the east

Street view, with proposed development area towards the right, photo looking towards the south

View northeast over site from near the southern boundary. Woodcutters have harvested invasive rooikrans (*Acacia cyclops*) stems in the foreground, and left the branches. Indigenous milkwoods are evident at centre and right (dark green trees).

View looking south over the site from near the western boundary. This area is dominated by the woody alien invasives Port Jackson (*Acacia saligna*) and rooikrans (*Acacia cyclops*).

The site is characterised by dense alien vegetation

Street view of the site from Lynx looking towards the north and the R43
